

I apply holistic design and development principles to make experiences both usable and beautiful.

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                  |                     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| UI Architect with Vectra AI in Austin, Texas                                                                                                                                                                                                                                                                                     | Dec 2016 – Present  |
| <ul style="list-style-type: none"><li>▸ Created new, modern UI for primary product and led maintenance/feature team in updates</li><li>▸ Oversaw creation and training of new front-end team/discipline in Dublin studio</li><li>▸ Acted as technical lead for UX guild, providing guidance and deliverables as needed</li></ul> |                     |
| UI Lead with Den in Austin, Texas                                                                                                                                                                                                                                                                                                | Apr 2016 – Dec 2016 |
| <ul style="list-style-type: none"><li>▸ Architected and developed Cordova app as flagship product</li><li>▸ Designed and built web presence as companion to mobile app</li><li>▸ Prototyped early iterations to prove product feasibility</li></ul>                                                                              |                     |
| Senior Software Engineer with Avention in Austin, Texas                                                                                                                                                                                                                                                                          | Jan 2015 – Apr 2016 |
| <ul style="list-style-type: none"><li>▸ Architected and coded majority of new customer-facing application</li><li>▸ Led front-end team building additional features for new app</li><li>▸ Developed and implemented visual design for new products</li></ul>                                                                     |                     |
| Senior Software Engineer with frog design in Austin, Texas                                                                                                                                                                                                                                                                       | Jan 2014 – Dec 2014 |
| <ul style="list-style-type: none"><li>▸ Built out new features onto existing web apps</li><li>▸ Created full-stack build and deploy processes for client applications</li><li>▸ Prototyped conceptual interfaces to prove technical feasibility</li></ul>                                                                        |                     |
| Technical Architect with Headspring in Austin, Texas                                                                                                                                                                                                                                                                             | Sep 2010 – Dec 2013 |
| Game Developer with Sneaky Games in Lakeway, Texas                                                                                                                                                                                                                                                                               | Jun 2010 – Sep 2010 |
| Software Engineer with TrackAbout, Inc. in Moon Township, Pennsylvania                                                                                                                                                                                                                                                           | Jan 2010 – May 2010 |
| Software Engineer with McLane Advanced Technologies in Temple, Texas                                                                                                                                                                                                                                                             | Mar 2007 – Dec 2009 |

## PROFICIENCIES
